

August 6, 2026

To: MWSCAS Steering Committee

From: Donald Lie, Michael Soderstrand, and Randy Geiger (chair)
Future Symposium Subcommittee

Subject: Subcommittee Report

The IEEE International Symposium on Circuits and Systems (ISCAS) has selected a proposal to host ISCAS 2030 in Dresden Germany, tentatively in late May of 2030. As a designated Flagship Conference of the Circuits and Systems Society, the MWSCAS Steering Committee has committed to holding MWSCAS in North America when ISCAS is outside of North America. As such, a site for MWSCAS 2030 to be held in North America should be approved at the August 2026 Steering Committee meeting.

A summary of the recent and upcoming venues for MWSCAS follows:

2023 – Phoenix Arizona, Arizona State University, Co-chairs: Jennifer Blain Christen and Pamela Abshire
2024 – Springfield Mass., Western New England Univ. Co-chairs: Neeraj Magotra and Randy Geiger
2025 – Lansing Michigan, Michigan State University, Co-Chairs: Andrew Mason and Navid Yazdi
2026 – Cincinnati Ohio, University of Cincinnati, Chair: Rashmi Jha and Soumyajit Mandal
2027 - Lafayette Louisiana, University of Louisiana, Chair: Magdy Bayoumi
2028 – Houston Texas, University of Houston and Rice University, Co-chairs: Joseph Cavallaro and Jinghong Chen
2029 – Knoxville Tennessee, University of Tennessee, Co-chairs: Nicole McFarlane and Garrett Rose

The MWSCAS Future Symposiums Committee has received one proposal for MWSCAS 2030 and that proposal is from Bibhu Sahoo of the University of Buffalo and Jeffery Walling of Virginia Tech to host MWSCAS 2030 in Buffalo New York in collaboration with the University of Buffalo. They expressed interest last year in hosting the MWSCAS in Buffalo and have worked on preparing a formal proposal. Their proposal, with Bibhu Sahoo and Jeffery Walling as General Co-Chairs, is attached.

They have assembled a team of well-respected individuals with strong contributions to the greater circuits and systems community as both researchers and volunteer contributors to form an organizing committee. The MWSCAS was last in the State of New York in 1987 when it met in Syracuse so the Buffalo proposal would be a return to New York after over 40 years.

Buffalo is the second largest city in the State of New York and is readily accessible by air via the Buffalo Niagara International Airport. It is also within a reasonable driving distance from several major U.S. and Canadian cities. As a large city, there are sufficient options for lodging in the area.

The MWSCAS Future Symposiums Subcommittee unanimously recommends acceptance of the proposal by Bibhu Sahoo and Jeffery Walling to host MWSCAS 2030 in Buffalo New York.
